REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Neither Te Velde (U.S. 3,847,758), Matlow et al (U.S. 3,040,416), Paradise, (U.S. 2,904,613), nor Ralph (U.S. 3,025,335) teaches or suggests the method for producing a photovoltaic panel in independent claims 1, 6, 7, and 12, or the photovoltaic panel in independent claims 9 and 29. Note that claims 1 and 12 further define the producing step and have an embedding step with a temporarily-holding member. Claim 6 further defines the producing step and the forming step, and the forming step uses a container to which the first-light-transmitting material is supplied. Claims 7 and 9 use a plurality of transparent spherical members. Examples of said transparent spherical members have reference sign (150) in instant Figure 24. In claim 29, the recited first light-transmitting member fills a space between the first plane and a second plane which is parallel and tangent to the photovoltaic elements; and the recited second light-transmitting material defines the second plane. Matlow et al is the closest prior art to claim 29 since it has two transparent layers (42,43). However, Matlow et al's layer (43) does not define a second plane which is tangent to the photovoltaic elements (18). Such a tangency can be seen, for example, in instant Figures 27 and 28, where the bottom of layer (202) is tangent to the photovoltaic element (10).

U.S. Patents 6,528,717 and 6,620,997 are hereby made of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
